Experience

Northern Trust

May 2026 – Present

Software Engineer Trainee

Pune, Maharashtra

- Developing enterprise backend applications in the PADS team using Java, Spring Boot, and REST APIs.
- Building backend services with business logic, API integrations, SQL, Spring Boot, and Bruno API.
- Collaborating in Agile teams to develop scalable microservices following coding standards and code reviews.

Dentsu Global Services

Jul 2025 – Dec 2025

Analyst

Pune, Maharashtra

- Analyzed 1M+ records using Power BI, SQL, Python, improving reporting accuracy and data reliability by 20%.
- Collaborated with stakeholders to resolve data issues and translate requirements into optimized SQL queries.
- Worked in a cloud environment using AWS, OS & networking fundamentals for troubleshooting and reliability.

Projects

Global Bank Multi-Ledger Banking System | github.com/AtharvaAthanikar2003/Global-Bank-Multiledger-System

- Built full-stack banking system with Python, implementing multi-ledger transactions and account workflows.
- Created Databricks SQL pipelines processing multi-currency transactions to generate accurate balance summaries.

Credit Card Spending Behavior Analysis | github.com/AtharvaAthanikar2003/Credit-Card-Spending-Analysis

- Analyzed 20,000+ credit card transactions using SQL, Excel and Python to analyze spending patterns.
- Built interactive dashboard using Power BI to visualize transaction patterns and support data-driven decisions.

Electric Vehicle Market Trend Analysis | github.com/AtharvaAthanikar2003/Electric-Vehicle-Market-Analysis

- Processed 300,000+ EV adoption records using SQL and Python to identify regional growth and market trends.
- Created interactive Power BI dashboard to visualize EV adoption metrics and support strategic business analysis.

Technical and Soft Skills

Programming Languages: Python, Java, Springboot, R, C++, JavaScript, SQL, HTML5, CSS3

Databases: MySQL, PostgreSQL, MS SQL Server, Oracle SQL

Analytics Tools: Microsoft Power BI, Tableau, Microsoft Excel, Jupyter Notebook, Google Colab

Tools & IDEs: Git, GitHub, VS Code, Postman, Bruno API, ServiceNow ITSM

Cloud Platforms: Databricks, Snowflake

Soft Skills: Communication, Teamwork, Collaboration, Time Management

Publications

IEEE CONECCT 2025

Detection of Sapodilla Fruit Diseases Using EfficientNet V2 Large: A Comprehensive Approach for Agricultural Automation

- Developed and trained an EfficientNet V2 Large model on 1,200 sapodilla images from Rahu, Pune, achieving 99.17% training and 97.08% validation accuracy for precise disease detection.

ScienceDirect

A curated image dataset for sapodilla fruit (Manilkara Zapota) disease and fruit quality analysis

- A real-world dataset of 1,518 sapodilla (chickoo) fruit images, captured under diverse field conditions, categorized into Anthracnose, Bacterial rot, Healthy, and Sap bleeding classes for machine learning-based disease detection.

Certification

- Career Essentials in Data Analysis by Microsoft - LinkedIn
- Career Essentials in Business Analysis by Microsoft - LinkedIn
- Ascent - Snowflake Platform Training APAC Certificate - Snowflake

Education

Dr. D. Y. Patil Institute of Technology, Pimpri

2021 – 2025

Bachelors of Engineering - Computer Engineering, CGPA - 8.4 / 10

Pune, Maharashtra India
