Experience

Northern Trust

May 2026 – Present

Software Engineer Trainee

Pune, Maharashtra

- Developing enterprise backend applications in the PADS team using Java, Spring Boot, and REST APIs.
- Building backend services with business logic, API integrations, SQL, Spring Boot, and Bruno API.
- Collaborating in Agile teams to develop scalable microservices following coding standards and code reviews.

Dentsu Global Services

Jul 2025 – Dec 2025

Analyst

Pune, Maharashtra

- Analyzed over 1M+ records across Airlines, Digital Ads, Financial Services, and EV datasets for enterprise analytics.
- Built SQL-based data cleansing and validation in PostgreSQL and Excel, improving data quality by 25%.
- Designed Power BI dashboards for 20+ KPIs, streamlining workflows and cutting manual effort by 30%.

Projects

Global Bank Multi-Ledger Banking System | github.com/AtharvaAthanikar2003/Global-Bank-Multiledger-System

- Built full-stack banking system with Python, implementing multi-ledger transactions and account workflows.
- Created Databricks SQL pipelines processing multi-currency transactions to generate accurate balance summaries.

Kisan AI: Crop Disease Detection System | github.com/AtharvaAthanikar2003/KisanAI

- Developed deep learning-based crop disease detection system with 99% accuracy and 98% precision.
- Implemented efficient preprocessing and evaluation pipelines with real-time prediction integration.

Slidesync: Cross-Device Presentation Controller | github.com/AtharvaAthanikar2003/Slidesync

- Developed cross-device presentation controller using JavaScript and WebSockets for real-time synchronization.
- Optimized modular and responsive architecture to enable smooth remote slide navigation.

Technical and Soft Skills

Languages: Java, Springboot, Python, R, C++, JavaScript, HTML5, CSS3

Databases: MySQL, PostgreSQL, MS SQL Server, Oracle SQL

Tools & IDEs: Git, GitHub, VS Code, Postman, Jupyter Notebook, Bruno API, ServiceNow ITSM

Cloud Tools: Databricks, Snowflake

Soft Skills: Communication, Teamwork, Collaboration, Time Management

Publications

IEEE CONECCT 2025

Detection of Sapodilla Fruit Diseases Using EfficientNet V2 Large: A Comprehensive Approach for Agricultural Automation

- Developed and trained an EfficientNet V2 Large model on 1,200 sapodilla images from Rahu, Pune, achieving 99.17% training and 97.08% validation accuracy for precise disease detection.

ScienceDirect

A curated image dataset for sapodilla fruit (Manilkara Zapota) disease and fruit quality analysis

- A real-world dataset of 1,518 sapodilla (chickoo) fruit images, captured under diverse field conditions, categorized into Anthracnose, Bacterial rot, Healthy, and Sap bleeding classes for machine learning-based disease detection.

Certification

- AI Aware Program - Dentsu University
- Ascent - Snowflake Platform Training APAC Certificate - Snowflake
- Finacle General Basic - Infosys
- Angular - Developing Single Page Applications - Infosys

Education

Dr. D. Y. Patil Institute of Technology, Pimpri

2021 – 2025

Bachelors of Engineering - Computer Engineering, CGPA - 8.4 / 10

Pune, Maharashtra India
